Field 2 ☐

Help

Channels store all the data that a ThingSpeak application collects. Each channel has eight fields that can hold any type of data, plus three fields for location data and one for status data. Once you collect data in a channel, you can use the ThingSpeak interface to visualize it.

Channel Settings

- Percentage complete:** Calculated based on the number of data points collected in a channel. Enter a name describing your channel.
- Channel Name:** Enter a unique name for the ThingSpeak channel.
- Field#:** Check the box to enable the field. A channel can have up to 8 fields.
